

PhytoCare™

SKIN RECOVERY AND CARE

DIRECTIONS

Spray a light coating directly to cuts and abrasions. Apply twice daily until healing is complete (granulation, size reduction). **For piglet processing:** apply a light coating prior to and after processing.

Storage Temperatures between 40-80°F, do not allow product to freeze.

“ This natural technology fills an overlooked niche in improving skin wound healing in pigs.

- Dr. Andrew Bents, DVM

PhytoCare™ Skin Recovery and Care

is an advanced formulation of activated plant polyphenols. Polyphenols use the natural properties of plants to provide rapid healing. For use with: **Lesions, Cuts, Abrasions, Punctures, Ulcers & Sores**
