PhytoCare®

PRODUCER CONCENTRATE

PRINCIPLES OF PHYTOCARE™ NATURAL EXTRACTS

- PhytoCare™ captures the natural, rapid healing properties of polyphenols – the cellular building blocks of plants
- Supports enteric health and digestive function of livestock.
- Blocks toxins and unwanted bacteria from attaching to cells
- Promotes sealing and repair of damaged mucosal cells
- Supports the reduction of intestinal inflammation
- Supports cellular hydration of the intestinal tract
- Contributes to digestive stability
- Reduces diarrheal cellular dehydration
- Compatible with antibiotics and other treatments
- Anti-Biotic Free, All-Natural, Non-Toxic

Brookings, SD USA

GUT BARRIER FUNCTION

Concentrated Bio-active Polyphenols: —

- 1 Blocks attachment of toxins, and pathogenic bacteria to mucosal cells
- 2 Seals damaged cells and restores tight junctions by crosslinking proteins
- 3 Decreased inflammation by activated polyphenols

PHT all natural solutions are formulated to support normal digestive health and cellular hydration in animals and no claims or references are made as to curing, treating or preventing an animal disease.
